STUK Reflective Tape

STUK Reflective Tape is a light reflecting tape. The silver chevron design is the commercial standard, used extensively by councils across the land. A “Give Way”, for example, looks white in the middle, however, up close you will discover it is a silver chevron pattern. Yep, light reflective tape.

Available as a 12 roll CDU.

STUK Glow-in-the-Dark Tape

Photo-luminescent tape, or Glow-in-the-Dark, as we like to call it, stores light in the daytime, and then glows bright green for up to 10 hours after dark. The tape perpetually recharges itself, using natural or artificial light.

Packed in a bright counter display unit containing 12 rolls of STUK Glow-in-the-Dark Tape.

STUK Reflective & Glow Mixed Display

Why choose – buy both the Glow-in-the-Dark Tape and the Reflective Tape in a fabulous CDU, containing 10 rolls of each.

It looks great, consumers get to choose (and maybe buy both), and you only take up one space.

A very popular new line for STUK.
